COURSEWORK

UNDERGRADUATE

Object Oriented Programming
Data Structures and Algorithms
Database Management System
Operating Systems
Software Engineering
Computer Networks
App Development
Web Development

SKILLS

PROGRAMMING

Languages:

Intermediate:

- JavaScript
- HTML
- CSS

Familiar Languages:

- jQuery
- PHP
- Python

Familiar Technologies:

- React
- Flutter
- HTML
- CSS

Tools:

- Git

EXPERIENCE

MERN STACK DEVELOPMENT | Self-directed Learning and Project Experience

2021 - 2023 | Faislabad, Pakistan

- Dedicated significant time in learning data structures and algorithms concepts through online courses, tutorials, and personal projects.
- Developed some different Famous website clones using React, JS, HTML, CSS demonstrating proficiency in algorithm design and implementation.
- Created some different projects using different languages and frameworks for Self-directed Learning and Project Experience

PROJECTS

Portfolio Website | Personal Website (GitHub)

- Created a personalized portfolio website to showcase professional accomplishments and skills.
- Designed an intuitive interface with sections for Introduction, Skills, Services, and Contact Information.
- Implemented website features using HTML, CSS, JavaScript, and PHP.
- Ensured responsive design for optimal viewing on diverse devices and screen sizes.
- Enhanced user engagement with interactive elements and animations using JavaScript.
- Employed PHP for server-side scripting to enable dynamic content generation and form processing.
- Demonstrated proficiency in web development technologies and methodologies to deliver a high-quality website.

Disney Clone Website | GitHub

- The "Disney Clone Project" generally refers to various educational projects where we create clones of the Disney+ streaming service interface.
- These projects are typically built using modern web technologies like React.js, Firebase, and various APIs to mimic the functionality and design of the Disney+ platform.

SocialBook | GitHub

- Developed a front-end internet site called "Social Book," stimulated with the aid of using the functionalities of Facebook.
- Utilized HTML and CSS to layout and put in force the consumer interface, specializing in intuitive navigation and attractive visuals

Airbnb Clone | GitHub

- I Developed a fully functional Airbnb clone using React.js for the front end and Firebase for the backend and hosting. This project includes key features such as property listings, user authentication, and dynamic search functionality, offering a seamless and responsive user experience.
